

# Food Testing and Research Services

Experts for your most important food safety and quality decisions

## Scope of Services

### Routine Microbiological Testing

- Next-day Pathogen Screening
- Routine Quantitative Analysis
- Investigational Microbiological Analysis
- Ingredient and Finished Product Testing

### Environmental Monitoring Programs

- Equipment and Process Environment (pathogens and spoilage organisms)
- Water Potability
- Air
- Swabbing Services

### Automated Environmental Pathogen Monitoring Software

- Track individual microbial results to verify effective control of pathogens
- Instantly generate conformance and incidence reports
- Satisfies trend reporting requirements

### Intrinsic Factor Testing

- pH
- Water Activity

### Next Day Allergen Testing

- Gluten, Milk, Soy, Egg and Peanut, among others

### Certificates of Analysis

- Data downloading and printing capabilities through secure online portal
- Data Interpretation
- Customized Data Analysis

### Shelf Life & Product Stability

- Shelf Life Studies
- Validation and Challenge (inoculation) Studies

### Courier Service

- Same Day Pick-up Service 7 Days a Week in Los Angeles, Orange, Riverside and San Bernardino counties
- Swabs, air plates, water potability cups and allergen swabs available for delivery

### Consulting Services

- Expert Environmental Pathogen Program Development
- HACCP and Preventative Controls Plan Development and Review
- Audits and Audit-Readiness Consultations
- Foodborne Illness and Outbreak Investigations
- Product Spoilage and Contamination Investigations
- Product Specification Development
