

Shipping Directions

Swab Sample Submission Instructions:

Please ensure swabs are received at the laboratory within the following day after sample collection and that swabs are stored under refrigerated conditions until they are shipped to the lab. Ship via overnight delivery using insulated packaging with ample ice packs to maintain temperatures of less than 7°C / 44°F.

Perishable Food Products Submission Instructions:

Please ensure perishable food products, including water potability samples are also shipped via overnight delivery and that ample ice packs are including using insulated packaging to maintain refrigerated temperatures.

Sample Identification Instructions:

All sample description information to appear on the laboratory certificate of analysis should be written on the Sample Submission Form. The completed form can either be included in the package and/or emailed to our Client Service team at clientservices@foodmicrolabs.com. Alternatively, the sample site descriptions from eBacMap can be submitted with the samples (www.ebacmap.com).

Shipping Information:

All packages should be sent to the address below. Notification will be provided if samples are damaged in transit or temperatures are elevated upon receipt. If possible, it is best to avoid weekend and holiday mailings to minimize possible shipping delays. Additionally, early morning deliveries are not recommended and, if shipping on a Friday, be sure to clarify shipment is for Saturday delivery.
