

Shelf-Life Questionnaire v.041023

Shelf-life studies are created with the help of our laboratory director and are formulated based on your product specifications.

Your Name and Company:

Can you provide the following information for *each* product you would like tested for shelf stability?

1. What is the product?
2. How will it be stored?
3. What is your ideal/target shelf life?
4. How is the product packaged? How much product is in each package?
5. Do you know the pH and/or water activity?
6. Do you have any preservatives in your product?
7. Optional: Is there any special processing performed on your product (Hot Packing, Pasteurization, HPP, etc.)

Testing recommendations will be decided based on this information and from there, we will propose a shelf life study including a testing outline and pricing.
